REASONS FOR ALLOWANCE

1. The following is an examiner's statement of reasons for allowance:

Claim 1 is the only independent claim all claims depend from claim one and are allowable for at least the reason claim 1 is allowed.

Claim 1:

A stop and start control apparatus of an internal combustion engine comprising: a stop control unit which controls a crank angle of the internal combustion engine within a range of a predetermined crank angle at a time of stopping the internal combustion engine; and a start control unit which starts the internal combustion engine by a cranking unit at a time of starting the internal combustion engine, **wherein the start control unit starts the internal combustion engine by different methods when there is a probability that the internal combustion engine does not stop within the range of the predetermined crank angle and when the internal combustion engine stops within the range of the predetermined crank angle.**

It is known by the likes of Brehob et al, Downs et al, and Grob et al. etc. to bring an engine to rest at a controlled crank angle. It is also known by the likes of Bolenz et al and Morimoto et al either a conventional starter or a starter generator or both to start an engine. However, the prior art does not suggest or teach the combination when there is a probability that the internal combustion engine does not stop within the range of the predetermined crank angle. Bolenz et al and Morimoto et al and other art of record use the engine or environmental temperature to determine the starting method. A person having ordinary skill in the art would not consider the variation in cranking load between different stopping locations to be in the same degree as temperature variation. Thus the prior art teaches away from the combination.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Allowable Subject Matter

2. Claims 1-13 allowed.

Conclusion

3. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure are discussed in reasons for allowance.
